

# PurGo

waste management software

PurGo is a market-leading next-generation ERP waste management & recycling software system, relied upon by hundreds of customers to manage all waste collection and management processes end-to-end.

## experts in waste management software

### Who are we?

Headquartered in Liverpool, UK, the team provide everything in-house including system development, software support, project implementation and training.

Employing some of the most experienced industry professionals, VWS Software Solutions is quickly becoming recognised as an industry-leading solution, delivering innovative and operationally efficient solutions to the waste collection and recycling industry.

Born out of customer demand for an intuitive and integrated waste management solution, PurGo waste management software is now being used hundreds of operators across Europe.

### What is PurGo?

Designed and built from the ground up by our team of experienced industry professionals from the waste management industry, PurGo is a modular and scalable solution, able to grow with your business and adapt to your changing needs.

PurGo integrates effortlessly with most business systems, meaning that those packages that are already implemented in your business will become one with your waste collection activities. A key integration, unique to PurGo, is its seamless integration with Vehicle Weighing Solutions' weighing systems.

Loved by back-office users and waste collection operatives alike, the software and interface are highly automated, exception driven and most importantly - intuitive and user friendly!

The system has resulted in an additional £1,500 revenue each week, which means that it more than pays for itself!

- ✓ Highly automated and exception driven

## what makes us stand out from the crowd?

### our experience

PurGo has been developed and built by our team of experienced industry professionals. They've all worked in operational roles in the waste management industry, so they've created a system that meets operator needs, based on real life scenarios, removing the need for any guess work. The result is a waste management software solution: built for the industry, by the industry.

### our approach

We pride ourselves with how closely we work with our customers. We get to know them, their businesses, their challenges and their objectives. We believe this is the only way we can ensure we are delivering a truly fit-for-purpose system that our customers wouldn't want to be without. Many of the companies we work with consider us as an extension of their own business - an honour we take very seriously. We realise that a "one size fits all" approach is never going to be the answer so our team are ready to work in partnership with you to create a system that gives you what you need.

### customer service, support & training

PurGo has been developed and built by our team of experienced industry professionals. They've all worked in operational roles in the waste management industry, so they've created a system that meets operator needs, based on real life scenarios, removing the need for any guess work. The result is a waste management software solution: built for the industry, by the industry.

### modular & flexible

No business stands stills. It is constantly changing, growing and realigning goals and priorities. We understand this and PurGo has been developed to support you and your business on its journey. Due to its modular design, features can be "bolted on" or removed, as required. We employ our own in house development team, which allows us far greater flexibility and enables us to be efficient and responsive when you need us to be.

“ PurGo is enabling us to convert most of our operations to a paperless system as well as provide our customers with full monitoring and complete traceability ”
